

Outline Case Study

KENT

The Old Oil fired boiler replaced by a 40kW and 8kW heat pump.

2 x 300l VPA hot water cylinders

4 x 400 metre ground loops to supply the 40 kW heat pump.

The Multipurpose Manifold 5000 is an optimal product for Ground Source Heat pump systems as it allows for easy and accurate flow adjustment. The flowmeter provides a real time view of the flow pressure, glycol and water levels.
